

International trade fair AMPER 2019 from 19th to 22nd March in Brno

# International fair AMPER 2019

There was a good opportunity to discuss not only with system integrators but also with aspiring designers and installers on many issues related to specific KNX installations. Many system integrators opted for closer cooperation with KNX NG CZ.

This fair was also an excellent opportunity to present the KNX system by giving a lecture at the attached conference and to announce the results of the competition for the best KNX project in the Czech Republic, completed in 2018.
